2001 SC7 Plenary – Nagoya (Japan)

ISO/IEC JTC1/SC7 - Italian participation and activities

The Italian delegation to the SC7 Plenary is not numerous (only 3 delegates) yet, we are very proud of our active contribution in two working groups (WG6 and WG10) where we provide co-editors for ISO/IEC 15504 Part 3 and for the revision of ISO/IEC 12119.

The Italian interest and activities are still focused on standards related to the definition, assessment and improvement of product and process quality. Although, at the moment we do not have the resources to cover all the working groups in these areas we constantly participate in WG6 and WG10 meetings while monitoring the work in progress in WG7 and WG18.

The Italian National Body UNINFO is currently leading an effort to translate the standard ISO/IEC 12207 into Italian, in order to satisfy a growing interest of our market for this standard.

The Italian delegation is also very happy to host a WG6 meeting which will be held in Bari from November 5th to the 9th.
